Self-test:
While printer is powered OFF, press and hold PAPER FEED button, then press and hold POWER BUTTON simultaneously. When beep is heard after approx. 3 seconds, release both buttons, and a test page will print with information on current status and character samples.

Paper feed:
When powered press PAPER FEED button. Paper will feed as long as the button is pressed.

Bluetooth setup:
Pairing with the instrument is necessary before printing via Bluetooth is possible.
The pairing process is done like this:
1. Power on printer
2. Let the instrument / PC search for other Bluetooth devices
3. A device called MPT-II should occur in the list of devices
4. Finish pairing

For detailed instructions how to initiate Bluetooth search, please refer to your device’s user manual.
Note: Do not have several printers powered on and within range while searching.

It is possible to pair up to 8 instruments with one printer. If more instruments are paired the oldest will be deleted.
