RetinaVue® Care Delivery Model

An effective, affordable and scalable primary care model to help increase documented diabetic retinal exam compliance and improve outcomes and quality measures across your organization.
Analyze
Original and enhanced images can be analyzed by the state-licensed, board-certified ophthalmologists at RetinaVue, P.C. or by your preferred eye specialists.

Report
Receive a complete diagnostic report from RetinaVue, P.C. including fundus images, ICD 10 codes and a recommended referral/care plan generally in one business day.

Acquire
Choose from an industry-leading portfolio of innovative handheld and desktop retinal camera options based on patient volume and workflow requirements.

Transfer
Send encrypted images through an award-winning, HIPAA-compliant, FDA-cleared RetinaVue Network software platform. (software plan priced per camera, per month)

Connectivity Counts
RetinaVue Network software offers fully integrated, bi-directional interfaces with EMRs including Allscripts, athenahealth, Cerner, Epic, NextGen and many others. Place exam orders and automatically access diagnostic reports from your EMR—streamlining documentation.

Analyse
Original and enhanced images can be analyzed by the state-licensed, board-certified ophthalmologists at RetinaVue, P.C. or by your preferred eye specialists.

Take control and improve management of your patients with diabetes using a simple four-step care delivery model.

Welch Allyn consultants will customize and operationalize a patient-centered system across your organization.
A flexible portfolio of innovative retinal imaging technology

RetinaVue 100 Handheld Imager
- One-third the cost of traditional tabletop cameras
- Touchless auto-focus and image capture for ease of use
- Lightweight retinal cameras and integrated wireless capabilities enable workflow flexibility

Tabletop Retinal Cameras
- Minimal technique required to operate
- Ideal in high-volume clinics with large diabetic patient populations
- Best for offices with non-designated camera operators or high turnover areas

Help improve quality measures and clinical documentation of chronic conditions

Accurate documentation of chronic conditions helps inform care planning, care delivery, appropriate coverage and quality performance. The quality measure for annual diabetic retinal exams (NQF #0055) is included in Medicare Advantage Star Ratings and CMS Quality Payment Program measures. Intercepting patients during routine primary care office visits can achieve up to 90% documented compliance in 12 months.
