Simple and Accurate Home Blood Pressure Measurement
From a Brand You Trust

Clinical Accuracy in the Home
Welch Allyn, a trusted brand in patient monitoring, has brought clinical technology to the home. With our advanced SureBP® technology, Welch Allyn Home Blood Pressure Monitor compensates for factors that may affect the accuracy of measurement, such as motion, providing a device that is more accurate and comfortable for use in the home.

Accuracy You Can Count On
82% of physicians agree that most patients do not follow all of the correct steps to get an accurate blood pressure when monitoring at home.¹ With SureBP technology, Welch Allyn Home Blood Pressure Monitor can help compensate for less than perfect conditions.

The Importance of Remote Monitoring
Self-measured blood pressure monitoring plus additional clinical support is one strategy that can reduce the risk of high blood pressure.⁴

Cuff Size Matters
The Welch Allyn Home Blood Pressure Monitor has the largest cuff range available with 3 cuff sizes (ranging in coverage from 15 cm to 54 cm.)

Designed for Patient Comfort
20 seconds to accurate reading fastest on the market²

Welch Allyn Home Blood Pressure Monitor captures blood pressure in about 1/2 the time as the leading competitor
