Facility—Includes hospitals (inpatient, outpatient and emergency department), ambulatory surgery centers (ASCs) and skilled nursing facilities (SNFs).
Non-Facility—Includes all other settings.

MEDICARE

Tympanometry may be used when evaluation is required to determine appropriate medical or surgical treatment for patients with a hearing deficiency or related problem.

• Documentation in the patient record should indicate the presence of a hearing problem that required further testing to determine the appropriate medical or surgical treatment.

Specific indications for coverage may vary by Medicare Contractor. Providers should refer to their Medicare Contractor’s Local Coverage Determination policies for specific coverage and billing guidelines.

PRIVATE PAYERS

Private payers typically provide coverage for tympanometry as part of a standard battery of tests for evaluation of a hearing impairment. Coverage guidelines and payment levels vary by payer and specific plan. Providers should contact each specific plan to determine coverage and payment for the use of Welch Allyn tympanometry products.
**MEDICAID**  
Medicaid programs may provide coverage for tympanometry as part of a standard battery of tests for evaluation of a hearing impairment. Coverage guidelines and payment levels vary by state. Providers should contact their local Medicaid program to determine coverage and payment for the use of Welch Allyn tympanometry products.

**OTHER CONSIDERATIONS**
- Include documentation in the patient’s records to indicate medical necessity for a separate service.
- Confirm that proper ICD-10-CM diagnosis codes are reported to justify medical necessity of tympanometry procedure(s).
- When appropriate, a modifier may be reported and support documentation should be provided with the claim.
- Some payers may have specific requirements for using certain codes, including prior authorization, restricted medical diagnoses or specialty provider types.
