Re: 747 Series Wall Transformer End of Life Notice

The Welch Allyn 747 series wall transformer was made obsolete with the introduction of the 767 series wall transformer in the early 1990's and the production of the 747 wall transformer was discontinued at that time. Welch Allyn was able to provide service and repair for the 747 units as long as parts were available to allow the repair.

Effective November 2006, the 747 wall transformer is considered fully obsolete. Service, repair, and parts are no longer available to support this product. The 767 series wall transformer is the direct replacement for the old 747 model. Below is a chart of the replacement part numbers based on power cord voltage required. If you require information on the 767 product, please contact the Welch Allyn Customer Service Department at 1-800-535-6663 or your local authorized Welch Allyn distributor.

<u>Part No.</u>	<u>Description</u>
76710	110V Wall Transformer, Domestic
76712	220V Wall Transformer, Europe
76714	240V Wall Transformer, UK
76716	240V Wall Transformer, Australia
